DURHAM, NH - New Hampshire residents' approval of President Trump's handling of the COVID-19 pandemic as well as his overall job performance has not changed since he contracted COVID-19. A majority continue to disapprove of Trump's overall performance, making his reelection more challenging than President Barack Obama's or President George W. Bush's during their reelection campaigns.

These findings are based on the latest **Granite State Poll***, conducted by the University of New Hampshire Survey Center. Nine hundred thirty-three (933) Granite State Panel members completed the survey online between October 9 and October 12, 2020. The margin of sampling error for the survey is +/- 3.2 percent. Data were weighted by respondent sex, age, education, and region of the state to targets from the most recent American Community Survey (ACS) conducted by the U.S. Census Bureau, as well as party registration levels provided by the New Hampshire Secretary of State and 2016 election results in NH. Granite State Panel members are recruited from randomly-selected landline and cell phone numbers across New Hampshire and surveys are sent periodically to panel members.

Presidential Approval

As Donald Trump finishes his first term, New Hampshire residents largely disapprove of his job performance. Currently, 44% of New Hampshire residents approve of Donald Trump's performance as president, 55% disapprove, and less than 1% don't know or are unsure. Trump's net approval rating (the percentage who approve minus the percentage who disapprove) is -11%, unchanged since September (-11%). In the month preceding their reelection, President Barack Obama had a net approval rating of +7% while President George W. Bush had a net approval rating of +5%. An approval rating of 46% or above typically results in reelection.

Presidential Approval - Donald Trump

* We ask that this copyrighted information be referred to as *the Granite State Panel*, conducted by the University of New Hampshire Survey Center.

Republicans remain firmly behind Trump - 91% approve of his job performance, an all-time high for Trump's presidency. However, only 35% of Independents and 1% of Democrats approve of Trump's job performance.

While Trump's approval overall is unchanged since September, it has changed among groups of New Hampshire residents. Approval of Trump's job performance has increased slightly since then among those aged 18 to 34 (+9 percentage points), men (+9), and Massachusetts Border (+17) and North Country (+25) residents. However, approval has declined since September among those aged 65 and older (-9), women (-9), college graduates (-9), and Connecticut Valley (-19) and Manchester Area (-17) residents.

COVID-19 remains the biggest issue facing the country and 56% of New Hampshire residents disapprove of President Trump's handling of the coronavirus (COVID-19) situation with 54% strongly disapproving. Forty-two percent approve of Trump's handling of the situation - 34% strongly approve and 8% somewhat approve - while 2% neither approve nor disapprove or don't know. Approval of Trump's handling of the COVID-19 situation is largely unchanged since the September Granite State Poll, which was completed before Trump contracted COVID-19.

Approval of Trump's overall job performance has tracked closely with approval of his handling of COVID-19 - only 1% of respondents disapprove of Trump's handling of COVID-19 but approve of his overall job performance and less than 1% approve of Trump's handling of COVID-19 but disapprove of his overall job performance.

Approval of President Trump's Handling of Coronavirus (COVID-19) Situation

Economic Approval

Currently, 48% of New Hampshire residents approve of President Trump's handling of the economy, 49% disapprove, and 3% neither approve nor disapprove or don't know. Approval of Trump's handling of the economy remains lower than before the COVID-19 pandemic: in February 2020, 57% approved of Trump's handling of the economy and only 38% disapproved.

Nearly all Republicans (95%) approve of Trump's handling of the economy while 46% of Independents and only 1% of Democrats feel this way. Approval among Republicans is largely unchanged since the onset of the COVID-19 pandemic, while approval among Independents and Democrats has slightly fallen.

Approval of President Trump's Handling of the Economy

Foreign Affairs Approval

Forty-five percent of New Hampshire residents approve of President Trump's handling of foreign affairs, 54% disapprove, and 2% neither approve nor disapprove or don't know.

Ninety-one percent of Republicans approve of Trump's handling of foreign affairs, an all-time high, but only 40% of Independents and less than 1% of Democrats feel this way.

Approval of President Trump's Handling of the Foreign Affairs

U.S. Heading in Right Direction or On Wrong Track

Six in ten New Hampshire residents (60%) believe that things in the United States are seriously off on the wrong track while 30% believe things are going in the right direction and 10% don't know or are unsure. Granite Staters have become more optimistic since September, when 72% said things were off on the wrong track.

Sixty percent of Republicans believe the country is headed in the right direction but only 34% of Independents and 1% of Democrats agree.

Granite State Poll Methodology

These findings are based on the latest Granite State Poll, conducted by the University of New Hampshire Survey Center. Nine hundred thirty-three (933) Granite State Panel members completed the survey online between October 9 and October 12, 2020. The margin of sampling error for the survey is +/- 3.2 percent. These MSE's have not been adjusted for design effect. The response rate for the October 2020 Granite State Poll is 35%. The design effect for the survey is 2.7%.

Data were weighted by respondent sex, age, education, and region of the state to targets from the most recent American Community Survey (ACS) conducted by the U.S. Census Bureau, as well as party registration levels provided by the New Hampshire Secretary of State and to 2016 election results in New Hampshire.

The Granite State Panel is part of an effort by the University of New Hampshire Survey Center to investigate new ways of gathering and understanding the opinion of New Hampshire residents. Approximately 5,750 New Hampshire adults were recruited from randomly selected landline and cell phone numbers to participate in the panel. Panelists are then asked to participate in online surveys sponsored by the UNH Survey Center.

The number of respondents in each demographic below may not equal the number reported in cross-tabulation tables as some respondents choose not to answer some questions. Due to rounding, percentages may not sum to 100%.

For more information about the methodology used in the Granite State Panel, contact Dr. Andrew Smith at (603) 862-2226 or by email at andrew.smith@unh.edu.
